

KANISHKAR R

AI/ML ENGINEER | ANDROID DEVELOPER

Internship

AI ENGINEER INTERN

OCT 2025- MAR 2026

Space Marvel AI

Engaged in developing AI-powered agents and exploring modern AI-technologies to strengthen end-to-end AI system development skills.

ANDROID INTERN

JAN 2025 -MAR 2025

Weefy

Worked as Android Developer supporting our product manager to build innovative, interaction based software solution for entrepreneur and small-scale business

PROJECT INTERN

JUL 2024 - JAN 2025

Centre For Health Research and Innovation

Worked as a Software Engineer, developing healthcare applications and supporting medical research, including ophthalmology and laboratory solutions.

Projects

Intelligent meeting Feedback System and Quality Tracker

Tech Stack: [React](#), [Mongo DB](#), [Microsoft Entra ID auth](#)

Worked as a Software Engineer, developing healthcare applications and supporting medical research, including ophthalmology and laboratory works.

AI/ML-Driven Predictive Maintenance System for EVs and IC Engines

Tech Stack: [Machine Learning](#), [arduino](#), [sensor monitoring](#).

Developed an AI-powered predictive maintenance system for EVs that detects potential failures using ECU and sensor data.

<https://github.com/CaneCilia/Ev-predictive-Maintenance-System-using-AIML>

AI Flight Assistant For The NORDO Aviation

Tech Stack: [AI Agents](#), [Langchain](#), [Vector DB](#)

Developed an AI-powered aviation assistant for handling NORDO communication failures through voice-based pilot support and decision assistance.

<https://github.com/CaneCilia/Nordo-Aircraft.git>

Clinical Laboratory Application

Tech Stack: [Android Studio](#), [Flutter](#) and [Java](#)

Created an open-source clinical laboratory application focused on medical report processing, secure authentication, and scalable healthcare record management.

About Me

Aspiring software engineer with experience in AI, Android, and full-stack development, seeking to apply strong programming and problem-solving skills to real-world software and AI-driven projects.

Education

B.E. CSE(AIML)

SONA COLLEGE OF TECHNOLOGY
ACADEMIC GPA: 8.05

2023-2026

DIPLOMA - COMPUTER ENGINEERING

CSI POLYTECHNIC COLLEGE

2020-2023

10th BOARD - CBSE (SSLC)

SRI VIDYA MANDIR SR. SEC SCL

2019-2020

Area of Interest

- Software Engineering
- AI/ML
- Android Development
- Embedded System
- System Architecuture
- Networking

SKILLS AND CERTIFICATIONS

Technical Skills

- Programming Language: Java, Python
- Frontend Development: Android Studio, Flutter, Node.js
- AI/ML: Machine Learning, AI Agents, RAG, Langchain
- Backend & Cloud: AWS, Google Cloud Platform, MongoDB
- Tools: Git, GitHub, Debugging, CI/CD
- Concepts: OOP, Software Engineering Fundamentals

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- MLOps for Generative AI by Google cloud skill
- AWS Architecture job simulation
- CCNA Data Analytics Essential certification
- Google Cloud Skill boost for Machine Learning API

ACHIEVEMENTS

Top 25 Finalist – CODEVOLT 25 Hackathon (Trailblazers Round) Developed an AI/ML-based Predictive Maintenance System for Raptee.HV to predict equipment failures and reduce downtime.

Publications

ICCISS 2026 - Computational Intelligence, Security and System
By Sona college of Technology
PAPER ID :ICCISS2026-309

Presented on : March 2026
